

When did you last replace your hygiene kit?

Extend the working life of your hearing protection with 3M™ PELTOR™ Hygiene Kits. 3M recommends replacing your earmuff cushions and foam inserts every 6 months or sooner if they are damaged. Quick and simple to use, you can replace your cushions to maintain the comfort you deserve and the head seal you need for proper attenuation.

3M™ PELTOR™ Hygiene Kits include replacement ear cushions and foam liners for that specific ear muff.

3M™ PELTOR™ Clean single use hygiene pads. Disposable covers for the ear cushions that are intended to provide a clean contact surface, especially useful when the headset is used by multiple people.

Gel rings consists of a soft and thin polyurethane skin filled with silicone gel which helps reduce pressure points, e.g. when using eyewear.
